

WILD BEHAVIOUR By Trevor Penfold

Celebrated nature photographer Trevor Penfold returns with another stunning collection of wildlife photography captured throughout the width and length of New Zealand.

Following up the immaculate *Visions of Nature* book a few years back, *Wild Behaviour* continues the photographer's survey of our country's beautifully diverse wildlife. The smartly produced book is yet another testament to Penfold's deserved national acclaim, assuredly targeted at both photographers and wildlife

enthusiasts. The imagery is accompanied not only by detailed observations of the animals' behaviours and the environmental changes impacting them, but helpful details about how the skilful photos were created.

A handsome landscape-format volume with top-notch, eco-friendly production values, *Wild Behaviour* is a must for local nature shooters and an ideal gift for anyone with a passion for animals and the wild.
